- We fulfilled all the orders
- Delivered to all customers

 YURiA-PHARM

INHALATIONAL ANALGESIA -

UMEROX® Inhalation vaporizer and device - is the only inhalation analgesic in Ukraine, that allows you to control the dose of methoxyflurane received by the patient and increases the comfort of painful procedures.

- Emergency pain relief in hemodynamically stable patients with trauma and associated pain who are conscious, by self-administration under the supervision of personnel trained in the use of this medicinal product.
- Pain relief in conscious patients under supervision and require pain relief during surgical procedures such as dressing changes.

Water developed by pharmacists

ReO for rehydration

ReO ensures the fastest possible absorption of water and electrolytes.

It eliminates symptoms of:

- dehydration;
- improves diuresis;
- reduces intoxication.

ReO has a pleasant salty taste, is easy to drink.

Izota for heartburn

Izota is a slightly carbonated water developed by pharmacists

- non-alcoholic drink with soda content for a special purpose;
- specially adapted to reduce the manifestations of heartburn and normalize digestion;
- recommended for daily consumption.

Biotech R&D

We are focused on the research and development of innovative therapeutic solutions and modalities, cutting-edge technologies, and approaches to cure the most serious and complex diseases.

Recombinant proteins/mABs

RNA therapeutics

Biopolymer gels/Hyaluronic Acid

Nanoparticles for API delivery

Organic synthesis

Inhalations
